Subject: 2pm #s - 2-14-12 Dimock Executive Summary Report

Jerry -

The attached summary includes the one residence (HW-7) sampled this morning. This will be the last sampling event until March.

Sampling operations will be suspended while the analytical data is being received, reviewed and collated.

Three residences are currently scheduled to be sampled in March (3/5/12 and 3/6/12).

There are currently five outstanding residences that we are still attempting to schedule. Of these five, one will not be back in the area before April.

An additional well survey is scheduled for tomorrow 2/16/12. The resident is located between two residents that EPA has sampled. The resident contact EPA regarding possible sampling. He indicated that Cabot has conducted sampling of the residence in the past.

EPA continues to review data submitted by Cabot in response to an information request.

As of noon today: START has 11 personnel on-site. Assuming all samples are shipped today, all START personnel will demobe by the end of the day.

2 SERAS personnel will remain on-site for the remainder of the week to continue with data management.

Bulk and bottled water will continue to be provided to the four (4) residences, as necessary.

3 ERRS personnel will remain on-site (1 RM, 1 FCA and 1 tech) .
